

ONYX for HP Latex 700/800

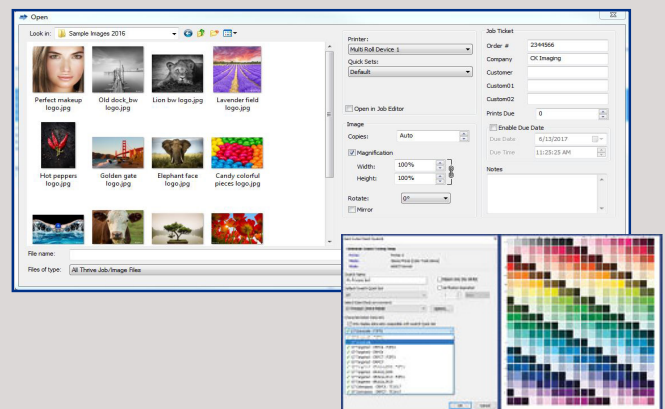

A winning solution for any Print Shop

Combine printer performance of the HP Latex 700/800 Printer Series with award-winning ONYX RIP software and improve profitability up to 30%. Superior color output, unrivalled RIP speeds, and easy-to-use automation tools reduce manual error and maximize print production.

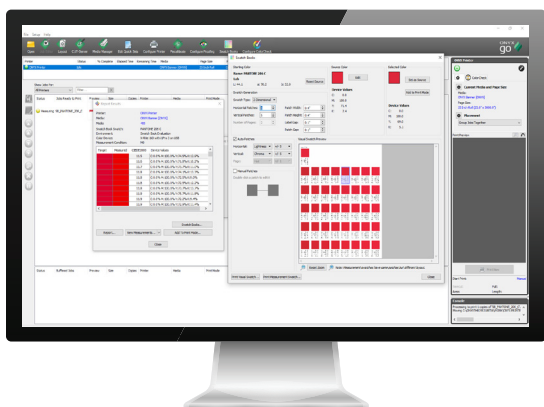

Print right the first time with dynamic tools for all wide-format print applications

- Never wait for a file with 2X faster RIP speeds and 5X faster production speeds
- Trusted technology with the Adobe PDF Print Engine
- Harness production potential with a full 64-bit platform and 16-bit image processing
- Automate jobs using white ink with Quick Sets
- Set and forget automation for hanging banners, pull banners, wallpaper and more
- Automate print-and-cut workflows
- Automatically add bleed, grommets and cut lines to print jobs

POWERED BY
Adobe PDF Print Engine

Faster, easier color matching with superior output quality

- Easy color matching with Swatch Books 2.0
- Save time and money with faster ICC profiling using the onboard spectrophotometer
- Maximize use of an expanded gamut with the ONYX Color Engine designed for wide-format
- Integrated PANTONE color library
- Synchronize color across devices with DeviceLink+
- Prove color output accuracy, consistence and conformance to color standards with ColorCheck*

*Optional add-on
