

# The importance of the last mile

- Finishing solutions for printed textiles.

*Artisans of Innovation*

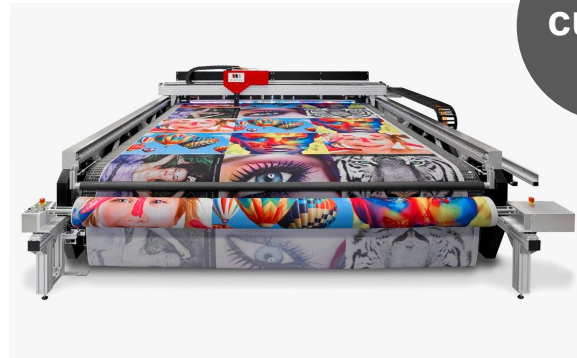

When you have printed beautiful banners and other fabrics displays, the finishing stage is important. A perfect finishing solution means the difference between having to reprint, or sending perfect prints in a timely manner.

This is where Matic comes in with reliable, accurate and easy to use finishing equipment.

From cutting, sewing to welding, Matic has a machine to help you deliver great prints with perfect finishing to your customers.

## Helios Plus Laser automatic textile laser cutting machine

It is specifically designed to cut printed fabrics with high-speed. It allows optimum use of printed fabrics due to the special scanning systems that scans the entire bed within 4 seconds before starting the cutting.

cutting

## HERA automatic impulse welding machine

HERA is a revolutionary concept of automatic welding machines that prove to be one of the most technologically advanced welding machines in the market. With all the innovative and automatic features, HERA can help you save a lot of time.

welding
